The image depicts a diagram of a detector system, labeled with various components and connections.

- **TRD**: A ring labeled with numbers 0 to 17, possibly indicating sectors or rings of the detector.
- **Supermodule**: A series of steps or modules labeled with $z_{lab}$.
- **Stack**: A vertical stack of modules.
- **ROC** and **ROB**: Right-Output-Channel (ROC) and Right-Output-Block (ROB)

Connections and labels include:
- **CTP**: Connected to the Trigger Unit (x 18)
- **DAQ**: Connected to the SuperModule Unit (x 5) and the Track Matching Unit (x 6)

The diagram illustrates the flow of data or signals through these components, with marked connections and labels.
